

Facundo Ezequiel Leis Pou

Full Stack Web Developer

Florianópolis, Santa Catarina, Brazil · facundoezequieleis@gmail.com · [LinkedIn](#)

Summary

Full Stack Web Developer with a formal **technical** certification in Information Technology from SENAI/SC and 2+ years of hands-on development experience building end-to-end web applications. Strong in TypeScript, JavaScript, Python (including data-oriented work), SQL, and **Java with the Spring Framework** and related libraries. Comfortable across modern frontend stacks (**vanilla JavaScript**, Angular, React, **React Native**, **Vite**-based workflows), backend APIs, and CRM-driven automation. Currently **implementing a RAG (retrieval-augmented generation) system**; practical experience with LLM integrations, agent-style workflows, and automation platforms (Claude, Mistral, Cursor, Lovable, vibe-coding tools, Make, MindStudio, n8n). Foundational exposure to **machine learning** concepts alongside deep day-to-day use of AI-assisted and no/low-code delivery. Background in technical support and CRM automation supports system architecture, data flow, and real-world requirements. **English near-native**; Spanish (native); Portuguese (fluent); experience across US, Latin American, and Brazilian markets.

Technical Skills

Languages: TypeScript, JavaScript, Python (including data-focused scripting and analysis), SQL, Java (Spring Framework and ecosystem libraries)

Frontend & mobile: HTML5, CSS3, vanilla JavaScript, Angular, React, React Native; Vite-based build and dev workflows

Backend & APIs: Node.js, REST APIs, Java / Spring

Databases: SQL (relational), CRM systems

AI, ML & automation: RAG implementation (current); introductory machine learning knowledge; automation and AI tooling — vibe coding and AI-first IDEs (Cursor, Lovable, and similar), AI agents, Anthropic Claude, Mistral and other LLMs, Make, MindStudio, n8n, and custom automation pipelines

Low-code, CMS & integrations: WordPress; no-code / low-code tools and third-party integrations; AI-assisted and vibe-coding delivery

Blockchain: Smart contracts (advanced certification)

Tools & platforms: Git, CRM platforms, SERP/SEO analysis tools, MS Excel (advanced)

Languages (spoken): English (near-native; ECCE — CaMLA, Grade A), Spanish (native), Portuguese (fluent)

Experience

Freelance Full Stack Developer

Self-Employed · Florianópolis, SC, Brazil

Jan 2024 – Present

- Design, develop, and deploy full-cycle web applications as a solo developer, owning the entire stack from database schema to UI.
- Build automation workflows and integrate third-party APIs to streamline client business processes.
- Implement CRM integrations and data pipelines for small business clients.
- Apply TypeScript across projects to enforce type safety and improve code maintainability.

AI Automation Specialist

Dell Digital · Remote

Jul 2021 – Present

- Develop and maintain AI-driven automation pipelines to optimize internal workflows and reduce manual processing overhead.
- Integrate LLM-based tools (including Anthropic Claude API) into business processes to automate document handling, data extraction, and reporting.
- Collaborate with technical teams to scope, prototype, and iterate on automation solutions.
- Analyze operational data to identify bottlenecks and implement scripted solutions using Python and TypeScript.

CRM & Automation Coordinator

VKM Law Group · Florianópolis, SC, Brazil

May 2025 – Present

- Architect and manage the CRM system, including automation rules, pipeline configuration, and data integrity workflows.
- Build and maintain marketing automation sequences and lead tracking integrations.
- Develop internal tooling to streamline client intake data processing and reporting.
- Conduct marketing performance analysis using data-driven methods to improve campaign targeting.

Internet Assessor (SERP / SEO Analyst)

Lionbridge · Remote

Jun 2012 – Nov 2012

- Evaluated search engine results pages (SERPs) to assess relevance, quality, and ranking accuracy.
- Contributed structured feedback used to train and tune search ranking algorithms.

Technical Support Representative

Teleperformance · Buenos Aires, Argentina

Jan 2008 – Nov 2009

- Provided bilingual (English/Spanish) technical support for US-based clients across multiple technology verticals: VoIP providers, home internet service providers, and PTT telephone manufacturers.
- Diagnosed and resolved connectivity, configuration, and hardware issues in real time.
- Operated across multiple projects simultaneously, demonstrating adaptability to different technical environments and protocols.

HR Data Analyst

Hay Group · Buenos Aires, Argentina

Mar 2011 – Oct 2011

- Processed and analyzed compensation datasets for North American and Latin American markets using MS Excel (advanced formulas, pivot tables, reporting).
- Built and maintained structured databases, ensuring data accuracy across Canada, USA, and LATAM projects.

Education

Fullstack Developer — Information Technology (formal technical program)
SENAI/SC – Serviço Nacional de Aprendizagem Industrial · Jan 2023 – Dec 2023

Certifications

The Fullstack Developer credential is a **formal technical certification** from SENAI/SC; the remaining items below are from online learning platforms unless noted.

Certification	Issuer / notes
Fullstack Developer — Information Technology	SENAI/SC — formal technical certification
ECCE (Certificate of Competency in English), Grade A	CaMLA
Blockchain Advanced	Online learning platform
Learn SQL	Online learning platform
Python	Online learning platform
